# BENEFICIARIES

## FUTUREVET

ERASMUS PLUS PROJECT

### TECH COMPANIES

This project will help these companies to modify their organization, train their staff and establish internship processes that really contribute to achieving their objectives more efficiently... but above all, to realize the magnificent opportunity that the new VT represents and to work with students.

### VET STUDENTS

FUTUREVET will promote the development of materials and tools that meet the specific needs of these students, adapted to a professional training model.

### VET TEACHERS

FUTUREVET will help implement all the changes required by the new VET model. VET teachers will receive the appropriate advice and tools to modify their methodologies, promoting the participation of companies in training processes, adapting their contents to the new VET structure. All this through an inclusive perspective that provides real opportunities for job integration to its students.
